Wetland field guide

Grey herons stand still in shallow water.

They hunt fish, frogs and small mammals.

Count them at first light from the north hide.

Heron calls

A harsh ’fraank’ in flight.

Bill clattering at the nest in spring.

Young herons beg with a ticking call.

Owl pellets

Owls bring up the bones and fur they cannot digest.

Look under roosts in barns and old trees.

Wear gloves and bag each pellet with its date.
